

INFINITY WARRANTY

Fill ALL fields below, then email completed form to customersuccess@quikstor.com

Every QuikStor Infinity Series keypad sold in a Polycarbonate housing and verified as operational and properly connected per QuikStor’s documentation (requirements below) will be covered by a ONE year warranty including lightning damage. Should such a QuikStor keypad ever fail during the activated warranty period, a replacement unit of comparable age and condition will be shipped via FedEx or UPS Ground at QuikStor’s expense. The client may have the replacement keypad shipped at a faster rate at their expense.

To activate your new warranty simply complete a separate copy of the warranty page for each keypad you wish to be warrantied. This warranty becomes void if the warrantied keypad, or its components, are ever attached to equipment, or wired in a manner, that was not pre-approved in writing by QuikStor management.

The client will be responsible for all warranty related installation, servicing, shipping, and handling charges. The client will be billed for this replacement until the damaged unit is returned to QuikStor. If the defective equipment is not returned within 14 days the client understands that they will be billed in full for the replacement parts. QuikStor shall have the sole and final determination if a keypad failure is covered under this warranty.

List the 1-10 digit serial number of ONE QuikStor Infinity Series keypad that you would like to activate under this warranty agreement. This number is typically printed on a blue sticker located on the top of the circuit board’s far right edge.

Keypad serial # _____

For this keypad, initial every step that you have personally witnessed to be true. This warranty is not in effect if any step has been skipped, not initialed, or was done incorrectly.

_____ The “Earth Ground” connection has a securely installed grounding wire of gauge #12 or #14 AWG and is connected to a 6 to 8 foot long grounding rod.

_____ The grounding rod is no more than 6 feet from the keypad circuit board.

What is not covered under this warranty? – This warranty does not cover physical abuse, vandalism or damage caused by vehicles. The warranty only covers the actual keypad circuit board, though QuikStor, at its own discretion, may send a replacement housing to facilitate replacement.

In no way will QuikStor be held responsible for any damage or injury to person or property. QuikStor’s sole responsibility under this warranty is to provide a replacement keypad circuit board. The one-year warranty begins at the time of purchase and is only valid if activated as described in this agreement. The warranty period does not start over after a replacement keypad is provided by QuikStor. If a site experiences a device failure, QuikStor may require that an electrician or lightning professional evaluate the grounding. Provide photographs detailing every wire connection noted above and label each picture with your facility name and keypad serial number. Your keypad warranty is activated once these pictures, a signed copy of this agreement and a printed or faxed QuikStor gate activity report (listing at least 20 consecutive accepted access codes) are delivered to, and signed off, by senior QuikStor management.

By signing and dating this page, you agree to all the above terms listed herein.
